

EXCELLENCE THROUGH INTEGRITY

ABOUT US

International Aero Training Academy (IATAC) is flight training academy approved by the Civil Aviation Authority of Malaysia (CAAM). IATAC is now operating in the Malaysia International Airport after operating in Sabah for 6 years.

IATAC uses Diamond and Piper aircraft as its training aircrafts and currently have the DA-40 single engine aircraft, DA-42 multi-engine aircraft and Archer III PA-28-181 single engine aircraft in its fleet. As for the simulator training, we have the ALSIM and Diamond FNPT-II simulator.

As for the Theoretical Knowledge training, IATAC uses computer-based training programme from a service provider in the United Kingdom (UK) that will ensure that all trainees are delivered with the best knowledge to become a successful pilot in the industry.

IATAC is committed to provide the best training environment to all our cadets while ensuring the highest level of safety, integrity and professionalism.

IATAC PILOT TRAINING PROGRAMMES

IATAC's training programmes are designed to meet the requirements set by CAAM as well as the aviation industry in Malaysia. Cadets will go through professional training, provided by a competent team of Theoretical Knowledge and flight instructors using IATAC's latest training aircraft. Through these programmes, cadets will garner the skills to enable them to take charge of flight deck.

EMPLOYABILITY

Our comprehensive flight training is geared towards placing the cadets in the airlines flight deck. The cadets will graduate successfully for a career in aviation as pilots.

COURSES & DURATION

IATAC has courses for beginners seeking an aviation career or those transitioning as a certified flight instructor. Our syllabus can be modified to meet the specific requirements of any airlines or national aviation authorities.

Private Pilot License (PPL)	Single Engine	3 months
